EXPERIENCE

Jan 2020 Present

SENIOR BACK-END ENGINEER
Self-Employed. Remote Work

I often work with PHP as it is fast to code and time is a priority, but I am familiar with other languages, multiple databases, data structures, security breaches and more. Upon becoming familiar with a library/framework, I can work at the expertise level of a Senior Developer.

Oct 2023 Present

DISCORD APPLICATION DEVELOPER
Self-Employed. Remote Work

Discord is an ever-growing communication platform many young people use. I have used their APIs to implement AI-generated support, AI-generated images, systems, commands and menus with different components that allow a user to easily navigate to a task.

Jul 2016 Present

SALES, MARKETING & SUPPORT
Self-Employed. Remote Work

Thanks to my career starting at kid age, I have sold and communicated with tens of thousands of customers. I can be patient, persuasive, overcome challenging individuals and think of abstract ways to combine products into offers and models that psychologically attract a potential buyer and outshine competitors.

Jul 2016 Present

MINECRAFT PLUGIN DEVELOPER
Self-Employed. Remote Work

Teams of developers have evolved the Minecraft Server into the Bukkit API Java library, which I have used to implement anti-cheat systems, statistics measurement, ban-evasion protection and more. My most well known project is the "Spartan AntiCheat" which has risen to the top amongst 40+ thousand other sold plugins.

Jan 2018 Present

JUNIOR FRONT-END DEVELOPER
Self-Employed. Remote Work

I have basic knowledge with HTML, CSS & JavaScript, sufficient enough to properly collaborate with Front-End Developers as the Back-End Developer and put their ideas into practice.
